

PENN MANOR SCHOOL DISTRICT

INFORMATION TECHNOLOGY DEPARTMENT

Technology Guidelines for Guest Speakers

Vistors planning to use presentation hardware (projectors, sound systems, etc.) should notify the Information Technology Department at least five business days prior to the event.

Using a Personally-Owned Laptop with District Wireless Network

The wireless network “Guest” is available for guest access throughout all district buildings. After connecting, your browser will be directed to a network registration page. Following acceptance of the Usage Policy, your device will have access to the Internet.

Important Note: Penn Manor’s Internet connection is filtered. The guest wireless network restricts access to YouTube, Vimeo and other online video streaming services.

Audio Visual Connections

The majority of Penn Manor School District buildings support VGA display connections. However, the following buildings support HDMI display ONLY:

- Manor Middle School
- Hambright Elementary School
- Central Manor Elementary School

Guests intending to present in any of the above buildings must have a device with HDMI output or a compatible HDMI conversion device. If no such device is available, please contact Information Technology at support@pennmanor.net with a request to obtain a temporary laptop a minimum of five business days prior to the event.

For more help, contact the Help Desk at support@pennmanor.net or 717-872-9500 x1776
