Penn Manor School District

Information Technology Department

Guidelines for Guest Speakers

Vistors planning to use presentation hardware (projectors, sound systems, etc.) must notify the Information Technology Department at least three business days prior to the event.

Using a Personally-Owned Laptop with District Wireless Network

The wireless network "Guest" is available for guest access throughout all district buildings. After connecting, your browser will be directed to a network registration mechanism. Following acceptance of the Usage Policy, your device will have access to the Internet.

Audio Visual Connections

The majority of Penn Manor School District buildings support both HDMI and VGA display connections. However, the following buildings support HDMI input ONLY:

- Manor Middle School

- Hambright Elementary School

Guests intending to present in any of the above buildings must have a device with HDMI output or a compatible HDMI conversion device. If no such device is available, please contact Information Technology at support@pennmanor.net with a request to obtain a temporary laptop a minimum of five business days prior to the event.

For more help, contact the Help Desk at support@pennmanor.net or 717–872–9500 ×1776
